1. EXECUTIVE SUMMARY & OPERATIONAL HIGHLIGHTS

During the third quarter ended September 30, 2026, Aetheris BioLabs Inc. delivered record consolidated revenue of $418.6 million, representing a 24.2% increase compared to $337.0 million in Q3 2025. Top-line expansion was driven primarily by commercial adoption of the SyntheSeq-X9 automated proteomics platform across European and North American reference laboratories, alongside recurring reagent subscription contracts that accounted for 68.4% of total quarterly billings. Gross margin expanded by 190 basis points year-over-year to 71.4%, reflecting higher manufacturing utilization at our Zurich and Boston ISO-13485 cleanroom facilities.

4. CLINICAL PIPELINE MILESTONES & FULL-YEAR 2026 GUIDANCE

In September 2026, the U.S. Food and Drug Administration (FDA) granted Breakthrough Device Designation for our OncoTrace-MRD liquid biopsy assay panel targeting minimal residual disease in stage II–III colorectal carcinoma. Phase III multi-center clinical validation across 1,450 enrolled patients achieved an analytical sensitivity of 98.4% at a variant allele frequency threshold of 0.005%. Commercial launch under CLIA-certified laboratory developed test (LDT) guidelines remains on schedule for Q1 2027.

Based on year-to-date performance and current backlog visibility of $294.0 million, management is raising full-year 2026 revenue guidance from the prior range of $1,520M–$1,550M to a revised target of **$1,575M–$1,595M**, representing full-year organic growth of approximately 25.5% at the midpoint. Full-year diluted non-GAAP earnings per share (EPS) is projected between $2.84 and $2.92.
